

## *Dynastar* *Exclusive Active*

An authentic “Game Improvement” ski designed by Women, tested by Women, and now offered to Women at a price that crushes the competition when it comes to quality and performance.

Surprising torsional strength adds to the edge hold capabilities, making the Active a great choice for Women who spend most of their time on packed or icy trails. Carving is second nature to this ski and the skier feels a sensation of very light skis that go wherever you want, whenever you want. They are so easy to ski but they are so much more than the price would suggest. Get on a pair of “Exclusive Actives” and get better. on a ski that was designed for women, by women that ski and test all the skis throughout the design process.

The testers agree on this one. A ski that will actually help you get better.

## *Dynastar* *Legend Sultan 85*

Big and Bad with a full vertical sidewall and the best that Dynastar has to offer to advanced and expert skiers who demand the highest performance all mountain skis on the market. The Dynastar Legend Sultan 85 skis combine a wide, stable platform with deep side-cut and wood/titanal sandwich construction to deliver an unbelievable ski experience for passionate all-terrain skiers who want one no-compromise ski for groomers, crud and everything in between.

This is the ski of choice for most of our test team on our annual trip to Snowbird Utah. The 85 with its extended side-cut profile, is surprisingly agile and powerful on the groomers, while providing explosive authority in the powder and back country. The ski for real Experts who ski everything, everywhere, and ski it hard.

## *Dynastar* *Legend Sultan 80*

Its still a Legend Sultan, but the 80 is a little softer, lighter and more “co-operative” so for lighter skiers or those craving a user friendly weapon, but still want to bust loose on the toughest trails and glades and they plow through the crud. The deep V tip and Autodrive technology work together to yield smooth, quick turns from a lightweight ski design. An easy skiing, all mountain ski well suited for groomed runs and it will perform just as well in the deep stuff. The profile and construction of the ski allows the skier to easily start a turn and control the ski throughout a turn while the wider platform delivers the floatation needed in off piste conditions. Good skiers that spend time on trails but would rather be off-piste when the conditions are right will love the feel of the new Sultan 80.
